|  |  |
|--|-------------------------------------------------------------------------------------|

The screenshot displays the web management interface of an Inspur IAP5820i-E router. The main navigation menu on the left includes options like Basic Information, Network Settings, Cloud Platform, Work Mode, Factory Reset, and Reboot. The 'Basic Information' section is active, showing physical address (64:A3:41:AE:41:10) and model number (IAP5820i-E). A red box highlights the version number (1.029.10p1), with a note indicating it should be verified against the actual device version. The WAN port settings are also visible, showing work mode, IP address (192.168.1.137), subnet mask (255.255.255.0), and gateway (192.168.1.1).
